

InterDev Expands Partner Relationship with Esri

ALPHARETTA, GA – October 2, 2015 – InterDev, an Atlanta-area provider of information technology and security services, today announced it has expanded their partner relationship with Esri®, the world leading Geographic Information Systems (GIS) technology company, to include a Value Added Reseller (VAR) authorization. Esri partners with a VAR authorization enable users by providing them with access to the ArcGIS® Platform, as well as value-added solutions and services, which in InterDev's case includes such solutions as system design, installation, configuration, customization and on-site staffing assistance.

“We are honored to extend our partnership with Esri, a globally recognized leader in the mapping technology space,” said InterDev CEO Gary Nichols. “This comes on the heels of our ArcGIS Online Specialty designation and will enable us to offer customers a full palette of GIS products and solutions.”

“InterDev is committed to helping users solve problems and extend their use of GIS technology by collaborating with Esri,” said Nichols. “This authorization is a real win for InterDev, and it will be a great benefit to our customers.”

About InterDev:

InterDev has been providing information technology (IT) support and security services to corporations, non-profit and educational organizations and public-sector entities for more than three decades. In addition to managing and hosting IT operations for its valued clients, InterDev also provides leading edge IT security solutions -- based on technologies from Palo Alto Networks, Extreme Networks and Dell SecureWorks -- as well as telecommunications consulting including VoIP phone systems, and voice and data circuits. InterDev is a proud Microsoft Gold Certified Partner and Barracuda Networks Certified Diamond Partner. InterDev serves customers from offices in Atlanta, and Chicago.
