

InterDev Provides Managed IT Services to Jacksonville CPA Firms

ALPHARETTA, GA and JACKSONVILLE, FL – November 29, 2012 – InterDev, a leading Atlanta and North Florida-area provider of information technology and security services, today announced that they have been selected to provide managed IT services for two prominent Jacksonville-area CPA Firms, Barley, McNamara, Wild and Martin Certified Public Accountants & Associates (BMWM) and GunnChamberlain, P.L.

InterDev will be providing both firms with fully managed IT services including remote monitoring and patch application, helpdesk, backup and disaster recovery and CIO-advisory services. Both firms had previously been served by other First Coast area providers but chose InterDev for their reputation for personal service and security expertise.

“Our priority for an IT services firm is to keep our data safe and our systems running 24/7 – especially during tax season,” said Susan Kelly, Firm Administrator of GunnChamberlain, P.L. “From our initial meetings with InterDev, they made it clear that they will be here for us, proactively servicing our account – it is a breath of fresh air.”

One of the unique features of InterDev’s managed IT services is their all-you-can-eat approach which allows InterDev customers to obtain services for all their IT needs each month without limits on helpdesk call volume or support tickets generated.

BMWM’s requirements seemed simple enough, “keep our computers up and running,” explains David P. Barley, Sr., CPA and managing member of BMWM. “However our CPA firm operates a lot of industry-specific software that is fairly server intensive,” continued Barley. “With InterDev’s one-stop-shopping, we can get the support we need to keep everything from our applications to our desktops and servers running smoothly.”

InterDev entered the North Florida market earlier this year with the opening of a Jacksonville office and now employs a dedicated team serving that market in addition to their Atlanta-based sales and IT support team.

“When it comes to ensuring the security and integrity of their business information, increasingly business owners have come to appreciate the value of a fully managed IT arrangement,” said InterDev Branch Manager Mark Aston. “InterDev is pleased to be able to provide and deliver a high level of service and IT support for organizations of all sizes throughout the private and public sector.”
